

SEE, SPEAK, OPEN — FROM ANYWHERE

WHO'S AT THE DOOR?

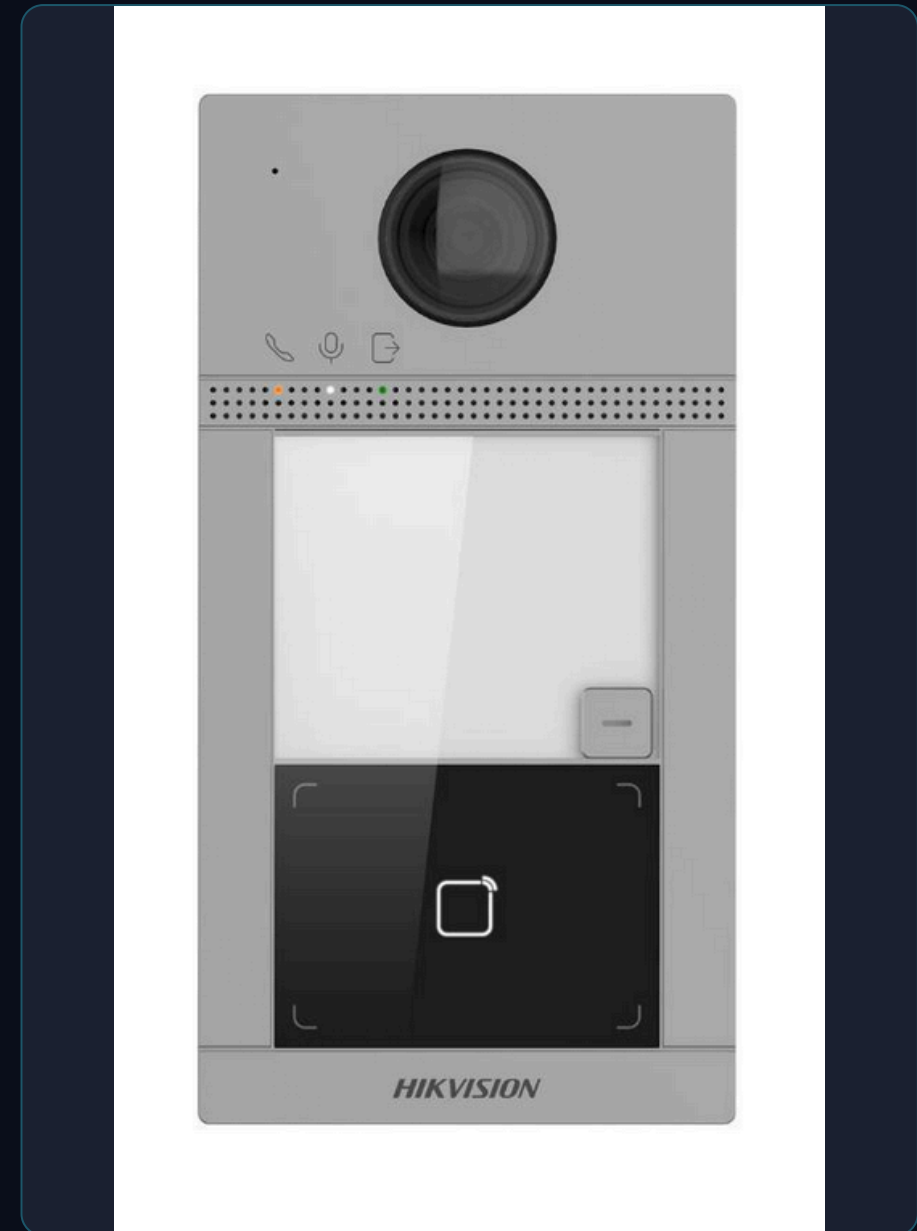

Premium video intercom systems — see your visitors, talk to them, and open the gate for them, no matter where you are in the world.

THE DOORBELL, REINVENTED

The traditional doorbell asks you a single, primitive question: "Are you home?" If the answer is no, it stops there. A delivery is missed, a visitor stands waiting, an unwanted guest is invited to try again later.

A modern video intercom turns that question into a conversation. You see who is at the door — clearly, in full color, day or night. You speak to them through your phone or a touchscreen inside your home. You open the gate for the right people and refuse the wrong ones, whether you are upstairs, at the office, or on the other side of the planet.

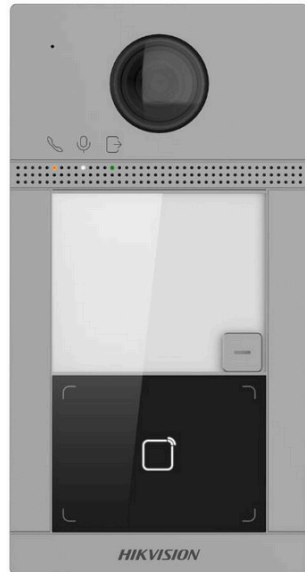

At **PT. Tri Solusi Neo Optima**, we install complete video intercom systems that integrate seamlessly with your network, your CCTV, your access control, and your gate — all from a single touchscreen and a single mobile app.

— SEE WHO. KNOW WHEN. OPEN FOR WHOM YOU CHOOSE.

OUTDOOR DOOR STATION

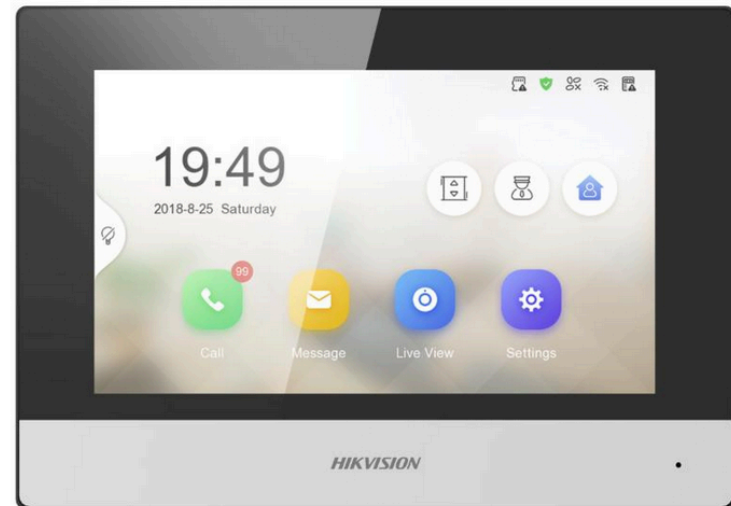

The Camera at Your Gate

- ▶ Wide-angle Full HD camera with night vision
- ▶ Two-way audio with noise cancellation
- ▶ Backlit doorbell button and proximity card reader
- ▶ Weatherproof, vandal-resistant alloy housing
- ▶ Power-over-Ethernet — single cable installation

INDOOR TOUCHSCREEN MONITOR

Your Window to the Door

- ▶ 7-inch capacitive touchscreen with crystal-clear video
- ▶ One-tap answer, talk, and unlock
- ▶ Live view, message log, and settings on the home screen
- ▶ Multi-room expansion — install monitors in any room
- ▶ Integrates with mobile app and CCTV system

HOW IT WORKS

A visitor presses your doorbell. In under a second, every screen in your home rings, every authorized phone wakes up, and you see exactly who is standing at your gate — no matter where you are.

FROM YOUR PHONE. FROM ANYWHERE.

Our intercom systems integrate directly with your existing electric gate, magnetic locks, and electric strikes. Approve a visitor, tap the unlock button, and the gate slides open — whether you're in the next room or in another country.

ELECTRIC GATE CONTROL

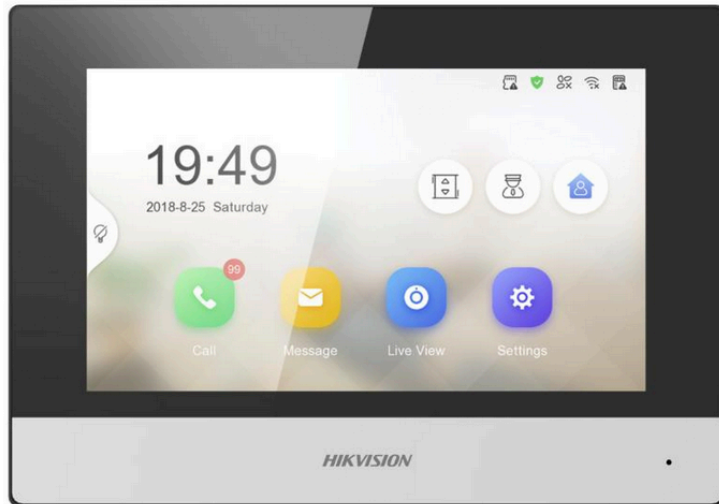

Open and close any sliding or swinging gate with a relay output wired into the existing motor.

DOOR LOCK RELEASE

Compatible with magnetic locks, electric strikes, and drop bolts. Same single-tap operation.

MULTIPLE OUTPUTS

Control gate, front door, and side door from one terminal — each with its own permission and trigger time.

BE HOME, EVEN WHEN YOU'RE NOT.

A free mobile app turns every authorized phone into a remote intercom. Answer the door from a meeting, the gym, a holiday — anywhere with an internet connection. Multiple family members can be enrolled, and access can be revoked instantly.

LIVE VIEW ANYTIME

Open the camera feed on demand to check who is at your gate, even without a doorbell press.

INSTANT PUSH ALERTS

Get notified the moment the doorbell rings or the camera detects motion.

TWO-WAY TALK

Speak directly with whoever is at the door from your phone, with crystal-clear audio.

REMOTE UNLOCK

Open the gate, front door, or side entrance with one secure tap from anywhere in the world.

AVAILABLE ON

iOS · Android · Tablets · Web

EIGHT WAYS TO COMMUNICATE

A complete intercom is more than a doorbell — it is a building-wide communication system. Once the wiring is in place, every monitor and every door station can talk to every other one, instantly.

DOOR TO ROOM

Visitor at the gate rings every monitor in the building simultaneously.

ROOM TO ROOM

Call any other monitor in the building like an internal phone — talk between bedroom, kitchen, study, and pool.

ROOM TO DOOR

Talk to whoever is at the gate from any monitor in the house, then unlock if you choose to.

AUTO-ANSWER MODE

Set any monitor to auto-answer for hands-free PA-style announcements throughout the house.

SCREEN-TO-DOOR PA

Broadcast a live announcement from any indoor monitor straight to the speaker at the door station — greet a visitor before they even ring.

MOBILE FORWARDING

If no one answers indoors, the call automatically forwards to authorized phones.

VISITOR SNAPSHOTS

Every doorbell press is logged with a photo and timestamp — see who came when you were out.

DO-NOT-DISTURB

Silence the indoor monitors at night — calls still forward to your phone for emergencies.

ONE INSTALLER. ONE SYSTEM.

A video intercom is at its most powerful when it lives inside a complete security ecosystem. Our intercoms share infrastructure, dashboards, and engineering standards with the CCTV, access control, and network systems we install — every component talking to every other one, every event logged in one place.

+ CCTV INTEGRATION

Every doorbell event is automatically tagged with footage from the nearest perimeter camera.

+ ACCESS CONTROL

The same touchscreen that answers the door also unlocks it — for biometric users, card holders, and remote visitors.

+ NETWORK BACKBONE

Powered by the same enterprise-grade integrated network we install for connectivity — see our companion deck.

+ GATE & DOOR HARDWARE

Direct relay control of electric gates, magnetic locks, and electric strikes — wired in once, controlled forever.

For over 17 years, **PT. Tri Solusi Neo Optima** has been the quiet partner behind the technology infrastructure of leading Indonesian enterprises — and the private residences of their founders.

60+

BUSINESS CLIENTS

Across 19 industries — from manufacturing and mining to maritime, healthcare, and hospitality.

75+
